

Vehicle Maintenance Policy

1. Scope

This policy sets the minimum maintenance requirements for every vehicle held on the Command A Brigade 2 establishment. It applies to all vehicle classes and to both owned and attached equipment.

Commanders are responsible for ensuring their vehicles are maintained to the standard set out here before any task is authorised.

2. Scheduled servicing

All vehicles must undergo scheduled maintenance every three months or 5000 kilometres, whichever comes first. Servicing is booked through the unit transport office in advance of the due date.

The maintenance checklist is the approved checklist held in the maintenance logbook. Every item must be signed off by a qualified maintainer.

3. Maintenance records

Maintenance records must be kept for five years and reviewed quarterly by unit logistics. Records include fault reports, parts issued and the signed checklist.

A vehicle may not be returned to service until the maintenance record for the completed work is filed.
